Timber

Analyse a garden ornament that you have at home or have seen before against these areas: style/appearance, materials used, cost, user group and safety.

Textiles

Research the traditional methods of clothing manufacture used in a country of your choice and present your findings in an interesting way. Consider what fibres, dyes and fabrics are used. How is the clothing shaped/ decorated?

Food

Create a shopping list for a weeks worth of meals and work out the cost of the ingredients using the internet or by going to your local shop.

Use scrap materials from around your house to make a model of a bug of your choice.

Design an outfit or piece of clothing inspired by the textiles of a selected country. Present your research and design on a "mood board".

Find a recipe of your choice and make it at home. Evaluate it and suggest at least one change or addition to improve it.

Use an image of a bug for reference and using a drawing method of your own choice draw an image of the bug. You could use pencil, coloured pencil, pen, paint, collage or any other method you can think of.

Choose a country and research the clothing worn in that country. Present examples and explain why you think these styles are worn.

Create a full colour A4 healthy eating poster aimed at young families. You should include the key elements of a healthy diet such as 5 a day.

Create a moodboard of images the size of 1 A4 page for your Megabug project. You should include a range of bug types, patterns, features (such as eyes, legs and wings) and present these in a nice way.

Find pictures of different styles of hats and present them in an attractive way.

Eat a food you have never tried before or something that you don't think you like and describe it using the 5 senses (sight, smell, taste, touch and sound).
