

Term	Autumn 1
Topics Covered	Preparation for externally assessed component: Students will complete a range of tasks and mini projects within vocational contexts that will help them develop their research, design, practical and evaluation skills that they will be required to use within the externally assessed component later in the year.
Expectations Challenge and Support	<u>Expectations</u> - Students will all be given opportunities to complete tasks that allow them to stretch their ability and build upon the skills they have already. They will undertake more complex project using tools and techniques they have learned in the past and will be taught new tools to expand their skills repertoire.
Assessment opportunities	The externally assessed component will test how learners can apply their research, ideas generation and practical skills within the constraints of a client brief. Learners will be provided with a client brief that they will respond to by producing an art or design final response. Learners will work through a development stage, review their development process outlining their intentions and make a final response for the client. The development and final response will be presented in a portfolio.
Homework	Students will be set one skills based homework per week. This may include research, drawing, analysis or evaluation but is not limited to these.
Vocabulary	Hyperlink to GCSE vocab dictionary to be added later.

Term	Autumn 2
Topics Covered	Preparation for externally assessed component: Students will complete a range of tasks and mini projects within vocational contexts that will help them develop their research, design, practical and evaluation skills that they will be required to use within the externally assessed component later in the year.
